PREFACE

This selected, annotated bibliography is designed to serve as a guide to instructional resources for teaching about contemporary Latin America at the secondary school level. The scope of the bibliography covers a wide range of educational materials and in selection an attempt has been made to include only the more significant and most recently published materials available in English and useful at the secondary level. A separate bibliography has been prepared for elementary school social studies.

Part I of the bibliography includes a listing of recent books and pamphlets which have content devoted primarily to Latin America and which can be used as supplementary materials by the teacher and student. It consists of two subdivisions: one for grades seven through nine and the other for grades ten through twelve. Most major series of books and pamphlets printed in English are included in this division and each series is annotated as a group. Books not included in a series are individually annotated. Most books in this latter category have been published or printed since the year 1960 and the majority of these titles are listed in the 1966 edition of Books in Print.

Part II of the bibliography includes a group of educational materials and resources to aid in teaching about Latin America. It consists of the following ten subdivisions: Bibliographies and Reference Works; Books and Pamphlets to Aid in Teaching About Latin America; Periodicals for the Teacher and Student; Periodical Articles to Aid in Teaching About Latin America; Official Sources of Information; Secondary Textbooks Devoted Exclusively to Latin America; Sources of Films and Filmstrips; Sources of Free and Inexpensive Learning Materials; Teaching Unites; Worktexts and Pamphlets for the Student.

The appendix includes the addresses of publishers and other sources cited in this bibliography.

NOTE: The research reported herein was performed pursuant to a contract with the United States Department of Health, Education, and Welfare, Office of Education.
